ORCHIDACEAE & ARACEAE

Discover the strength of Spathiphyllums

Introducing our Spathiphyllum range

We proudly add Spathiphyllum young plants to our assortment. Young plants that accommodate growers who want to produce and supply high-quality plants. Strength and versatility best describes our range. All plants are grown from seed. Their strength allows for longer transportation and longer shelf life. Our Spathiphyllum young plants are suitable for various pot sizes. It starts with 6.5, 9 and 13 cm pot size for short models. We also have pot sizes 13 cm and 17 cm for tall models and also varieties specially selected for 17 cm and 23 cm pot.

Our Spathiphyllum range is developed by Van der Voort Young Plants, a company specialised in breeding and propagation of these plants for over 20 years. Floricultura and Van der Voort Young Plants have established a partnership in 2018.

You will find our entire Spathiphyllum range in this flyer. Please contact one of our account managers to get more information about this product range and the availability of the varieties.

Ronald van Geest
CEO Floricultura
