Catalogue 2022/2023

Phalaenopsis

Floricultura
ORCHIDACEAE & ARACEAE

Orchids are our passion

A desire for perfection and the aim to develop strong, profitable and distinctive varieties for our customers - those are the driving forces behind Floricultura and its staff.
Our expertise and unique genetics enable us to offer a broad range of orchid young plants for every climate and every grower.

Market leader in propagation material
As the market leader in orchid propagation material, we supply professional growers worldwide with tens of millions of plants each year, to be grown into cut flowers and pot plants. We achieve this by having our own nurseries in the Netherlands, USA and Brazil.

For every grower, for every climate zone, and for every kind of consumer
Our success is founded on extensive research, an unique gene bank and many years of expertise. At our research and breeding locations in the Netherlands, we ensure both breadth and depth in our range of orchids.

For every grower, every climate zone, and for every kind of consumer. New products are only introduced to the market if they satisfy the very highest quality requirements.

We care about growers' results
Our customers appreciate this. They value the long-term relationship, in which we share our knowhow. For instance, about the development of new varieties. Growers can follow the progress of new products in our trial greenhouses.

After the varieties have been selected, we offer our customers assistance with cultivation at their own locations. We care about growers' results! Floricultura, breeding your success.

This catalogue provides an impression of our current introduced assortment. For more information and growing advice you can visit our website: **www.floricultura.com** or send an email to **orchids@floricultura.com**.

The specifications with regard to varieties are determined on the basis of multiple measurements conducted at Floricultura and a number of test locations. Spike length and percentages depend strongly on cultivation method used and local conditions.

All figures listed in this catalogue were carefully compiled by Floricultura. Please bear in mind that these are only indicative. No rights can be derived from them. Spike percentages based on insufficient data are not being published on this website. If you have any questions or require clarification about anything please contact one of our account managers.
