Floricultura
ORCHIDACEAE & ARACEAE

Breeding your success

At Floricultura, our success starts with people - and the plants they nurture. For over 90 years, our dedicated team has combined passion, expertise, and extensive research to develop strong, distinctive orchids and tropical plants. Our unique genetics form the foundation for varieties that deliver outstanding results for growers and consumers worldwide.

From our R&D and breeding facilities in the Netherlands, India, Brazil, Poland and China, we work together every day to ensure quality, uniformity, and innovation in every plant. Explore our latest Phalaenopsis assortment, including exciting new varieties - grown with care, backed by science, and ready to inspire!

With pride,
the dedicated team of Floricultura

Vase life

All varieties with a Royal FloraHolland tested vase life longer than 70 days have been given a special icon on their photograph. We have categorised these vase lives, starting with 70 days and over as the lowest category, and ending with 170 days and over as the highest category.

Although we internally test our varieties for 70 days, not all Phalaenopsis varieties in this catalogue have been given a vase life icon yet. This is because a number of tests are still waiting to be completed at Royal FloraHolland. These are still in the pipeline, so to speak. For the latest information, we kindly advise you to check our website www.floricultura.com.

Royal FloraHolland vase life tests

The vase life is based on longevity tests conducted by Royal FloraHolland. What's important to know is that these tests are conducted in a setting that simulates an average Western European living room, with varieties that are grown under average Dutch conditions. Therefore, the vase life of these same varieties, if they are grown in other parts of the world, may differ. Please remember, however, that these longevity tests are always purely indicative and subject to deviations.

The Netherlands

Phone +31 251 20 30 60
www.floricultura.com

The specifications with regard to varieties are determined on the basis of multiple measurements conducted at Floricultura and a number of test locations. Spike length and percentages depend strongly on cultivation method used and local conditions.

All figures listed in this catalogue were carefully compiled by Floricultura. Please bear in mind that these are only indicative. No rights can be derived from them. Spike percentages based on insufficient data are not being published on this website. If you have any questions or require clarification about anything please contact one of our account managers.
